But times have changed. Today's youth are driven by individuality, instant gratification, and experiences that feel personal. In this session, we'll explore why traditional incentives no longer cut it, and how personalised rewards, gamification, and innovative engagement strategies can transform survey participation. We'll look at how expectations have shifted over the past 10-15 years, and what this means for designing feedback systems. Ideation, problem solving and strategic thinking.</div>

1:45 PM	<div>1:45 PM - 2:20 PM</div> <div>Presentation</div> <div>You call this a ***** presentation?</div> <div>Paul Keitley, Manager, Student Surveys Systems at UNSW</div> <div>Student feedback offers critical insights into the learning experience, but it can also raise challenges when comments include inappropriate or harmful language. Over the past eight years, UNSW has refined its approach to reviewing and editing open-ended feedback comments to balance authenticity with the wellbeing of students and staff. This presentation outlines UNSW's journey in developing its comment review process and examines key questions that continue to shape institutional practice: Have we gone too far? Are we merely protecting ourselves? What are the real risks of intervention or inaction? The session also considers how emerging technologies may support a fair, transparent, and responsible approach to managing student feedback.</div>
