Reimagining Feedback in Higher Education: Introducing Explorance BlueX

Arjoman Chatterji, Senior Solutions Engineer at Explorance

The Survey Software That's Built for Everyone

Join this session for an exclusive look at BlueX a new survey platform redefining how higher education collects and acts on insights. Built to go beyond traditional form builders, BlueX enables academic teams to create expressive, intuitive, and actionable surveys with ease. From research projects to administrative surveys, BlueX delivers unmatched customization, seamless collaboration, and advanced analytics - so every voice can be heard and every decision can be data-informed.

In this session, you'll learn how BlueX enables institutions to:

- Empower campus-wide surveying across schools, faculties, and people while maintaining oversight through role-based sharing and approval workflows
- Deliver survey analytics and insightful reports within the same platform
- Adapt on the fly with live survey versioning, templates, and real-time respondent tracking
- Do more than surveys, including forms, newsletters, non-graded quizzes, and interactive content with a single intuitive survey editor

2:30 PM

2:30 PM - 3:30 PM

Workshop

BlueX hands on session

In this hands-on workshop, you'll learn how to design professional, on-brand surveys in BlueX with ease. Discover best practices for layout, logic and question flow, plus creative strategies for using BlueX across your institution, from decentralised surveys to research projects. Walk away ready to launch your own survey before the session ends.
